

VoIP Adapters – for standard phones

Linksys PAP2T

Linksys PAP2T features:

- Supports 2 phone lines
- Each line configured separately
- 2 FXS phone ports, 1 RJ45 Ethernet port

An adapter transforms your standard telephone to a VoIP compatible phone system, and the Linksys PAP2T is our most popular adapter. It is solid, reliable, and never “locked,” so you can use it with any VoIP service provider.

Linksys SPA2102

Linksys SPA2102 features:

- Supports 2 phone lines
- Each line configured separately
- 2 FXS ports, 2 RJ45 Ethernet ports (WAN & LAN)
- WAN port connects to your cable or DSL modem
- LAN port connects to your PC or other device

The Linksys 2102 adapter has two Ethernet ports instead of one, which removes the need to run separate Ethernet cables to your computer and phone, keeping your desk organized.
